TACK LOCKER MAXI COMFORT SECURITY

SAFETY PROTECTION OF THE SADDLE AGAINST THEFT

When it comes to keep your saddle safety, there is no place for risky compromises. In response to the growing market demand, we offer you the Maxi Comfort tack locker „SAFE Edition“ designed specifically for the equestrian competition.

EFFECTIVE PROTECTION AT A GOOD PRICE

In our tack locker, we used a number of proven solutions that allowed us to achieve greater resistance. They provide excellent protection of space with a saddle against burglary.

REINFORCED DOOR

Thanks to the use of stronger materials and an additional reinforced frame, the door construction is extremely rigid. The thief can leave a crowbar at home. It prevents the lock from being pulled out, and if it is damaged, the independent closing remains immobile.

DOORS ON IT'S PLACE

Even when the lock is damaged and the hinges are pulled out, the door stays in place thanks to a special construction. Thanks to modern solutions, the Maxi Comfort Cracker „SAFE Edition“ considerably extends the time the thief has to spend to get inside.

Made of steel, powder coated.

The tack locker is equipped with four pneumatic wheels with a diameter of 260 mm (2 swivel with brake, 2 fixed)

Possibility to change into rubber wheels with a diameter of 250 mm (2 swivel with brake, 2 fixed).
